One of the most famous new landmarks in the capital Skyline Belgrade, developed by AFI Europe, has after a successful move-in of the first residential tower, finished its second phase of the construction of a commercial 3-floor building, totaling over 3,800 sq m of NLA of prime office and retail space, located within the central piazzetta of the complex.

It is a pleasure to announce that the first lease acquisition has been signed and that around 30% of the commercial annex D has been leased to a renowned domestic engineering and manufacturing company Tervovent, with an assistance of the leading real estate consultancy in Serbia - CBS International, part of the Cushman & Wakefield Group as a leasing representative. The company Tervovent for nearly 30 years specializes as the leader in the manufacturing of Air Handling Units - HVAC, Clean Rooms and Service Engineering.

Skyline commercial annex D is a part of an already live complex and, most importantly, it has been built in a record time frame during the pandemic and now is ready and operational for the retail and office tenants looking to position their businesses within this unique project in one of the most progressive city areas in the past few years.
