## CBS International – The Winner of Prestigious Award for Interior Design of Office Space

CBS International, part of the Cushman & Wakefield Group, is the winner of the Saint Gobain Gypsum Trophy Serbia 2022 award in the non-residential category, that is, for interior designs applied in office buildings. CBS International HQ with an area of 1,000 sq m is located in the newest building in the business park Airport City Belgrade, on the 11th floor.

In accordance with new trends, the goal was to create an environmentally friendly and efficient work place, that will be functional and comfortable, as well as inspiring - one that encourages creativity and productivity of employees, team spirit and a positive work atmosphere. In order to achieve all that innovative Rigips systems were used as well as environmentally friendly materials, ergonomic furniture, recycled furniture, LED lighting, natural greenery...

The design was created and implemented by the CBS International Project Management & Design team of architects, specialized in the design and organization of office space in accordance with the modern businesses of companies.

- The biggest challenge when defining the workplace strategy, design wise, is precisely the flexibility of the space, which should suit all employees regardless of the generation they belong to, and that everything should be integrated into the company's branding. We believe that we have achieved a perfect balance between the two - said Silvija Đurić, Head of the CBS International Project Management sector.

The Saint-Gobain Gypsum Trophy is an event that rewards the combination of engineering skills and creativity, and the organizers are especially grateful for promoting drywall as the material of the future. Its implementation improves environmental protection, energy efficiency, acoustic performance, easier and faster installation, durability and saving of all resources.

The Saint-Gobain company is a global leader in modern and sustainable construction, and in December, the traditional competition Saint-Gobain Gypsum Trophy Serbia and Montenegro 2022 was held. It is the most prestigious competition in this field worldwide, and it was first organized in Paris in 1998. Today, this competition has over 30 participating countries with 70 projects worldwide and 350 participants.

The two winning projects from the markets of Serbia and Montenegro are expecting an exciting journey and a ceremony that will take place on April 28th, 2023 in Athens, where they will be presented with winning projects from around the world and compete for the prestigious awards.
